

Purifiner®

PDCR PDCR-I

*Hardness / Iron /
Colour Removal Systems*

Features:

- ◆ Fully Automatic Operation
- ◆ High Reliability
- ◆ Safe Low Voltage Operation
- ◆ High Efficiency
- ◆ Large Ported Valve Maximizes Water Delivery
- ◆ Includes Resin Bed for Tannin Colour Removal
- ◆ Permanent Storage of Settings Means No Batteries

Enjoy:

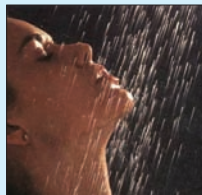

- ◆ Removes Tannins A Major Cause Of Colour And Odour In Some Waters.
- ◆ Water That Looks And Smells Better.
- ◆ Savings on Soap And Cleaning Products.
- ◆ A Great Pre-Treatment System For Ultraviolet Disinfection
- ◆ Reduced Maintenance On Household Appliances and Fixtures.
- ◆ Savings On Time And Money

with

PDCR PDCR-I Hardness / Iron / Colour Systems

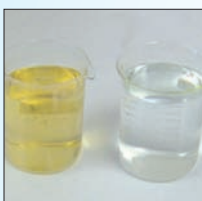

BATHING:

Calcium and magnesium carbonate in water combine with soap and shampoo to form a soap film on the skin and scalp. This film can retain dirt and bacteria and can cause drying of the skin. Softening your water removes this film from your body and reduces the deposition on water fixtures.

LAUNDRY:

Cleaning agents in detergents, grease and oils in dirty laundry water combine to form soap curds in hard water. Conditioned water prevents these formations, leaving clothes brighter and softer and lasting longer. You will also save money through the use of mild soap in your laundry instead of costly harsh detergents.

COLOUR CONTROL:

Eliminates colours associated with tannins and organics making your water much more pleasing in the bath, at the sink and in your home environment in general. The difference will be clear to you!

STAINING:

Water bearing iron can cause red to brown staining on water fixtures and have a metallic taste. Removal of this iron reduces the unsightly mess and extends the life of these expensive items. It also improves the taste of water for cooking and as a beverage.

PLUMBING:

Hard water can cause unseen problems with scale formation in plumbing fixtures, pipes and water heaters. Heavy scale can reduce water flow and significantly reduce the efficiency of your water heater. Conditioned water reduces this buildup and greatly increases efficiency while reducing maintenance costs.

DISH WASHING:

Hard water combines with soaps and detergents in dishwashers and leaves deposits as spots on your dishes, glassware and utensils. Conditioned water reduces spotting and allows savings in lower detergent usage.

- Simple user interface puts you informed and in control over all functions.
- Immediately begins to monitor water usage and automatically adjusts to your changing water needs.
- Oversize porting allows copious water delivery to meet the growing demand of the modern lifestyle.

- Superior reliability achieved by only three moving parts.
- Backed by over 50 years of valve engineering and manufacturing experience
- Let us show you how simple and reliable conditioned water can be.

Unit Specifications

	Model	Capacity Grains	Conditioner Depth X Width X Height	Brine Tank Diameter X Height
			Inch (cm)	Inch (cm)
Standard	PDCR-20	20K	14 X 8 X 53 (35 X 20 X 130)	16 X 35 (40 X 86)
	PDCR-30	30K	14 X 10 X 56 (35 X 25 X 138)	16 X 35 (40 X 86)
	PDCR-40	40K	14 X 10 X 63 (35 X 25 X 155)	16 X 35 (40 X 86)
	PDCR-45	45K	14 X 12 X 61 (35 X 30 X 150)	18 X 33 (45 X 81)
	PDCR-60	60K	14 X 13 X 63 (35 X 32 X 155)	18 X 40 (45 X 98)
High Iron	PDCR-20-I	20K	14 X 8 X 53 (35 X 20 X 130)	16 X 35 (40 X 86)
	PDCR-30-I	30K	14 X 10 X 56 (35 X 25 X 138)	16 X 35 (40 X 86)
	PDCR-40-I	40K	14 X 10 X 63 (35 X 25 X 155)	16 X 35 (40 X 86)
	PDCR-45-I	45K	14 X 12 X 61 (35 X 30 X 150)	18 X 33 (45 X 81)
	PDCR-60-I	60K	14 X 13 X 63 (35 X 32 X 155)	18 X 40 (45 X 98)

General Unit Requirements

	Maximum		Minimum	
	Metric	Imperial	Metric	Imperial
Operating Temperature	50° C	120° F.	2° C	35° F.
Operating Pressure	8.28 bar	120 psi	1.37 bar	25 psi
Supply Voltage	120 VAC			
Operating Voltage	24 VAC			
Power Requirement	6 Watts Continuous 10 Watts Intermittent
